

SUPERIOR COURT OF FRANKLIN, ESSEX COUNTY

**MAIRA RIVERA d/b/a RIVERA INSTRUMENTS v. NORTHSTAR
COURIER, LLC**

Case No. FC-2026-CV-0418 | Consolidated Pleadings, Discovery, and Internal Memoranda

This file is a fictional mock case document created for testing retrieval, chronology, citation, and inconsistency analysis. It intentionally contains competing narratives and several subtle date/time conflicts.

Filed	February 3, 2026
Incident	October 15, 2025
Location	Dock 3, 1180 Kingsley Industrial Road, Brenton, Franklin
Primary vehicle	Northstar truck NS-2041
Temperature logger	TempSure logger TS-7719
Key video source	CAM-D3 - disclosed clock lag of 11 minutes

Table of Contents and Index of Cross-References

Section	Short Description	Key Cross-References
I	Case chronology and disputed facts	Menon Aff. paras. 8-12; Exhibit Packet pp. EP-004 to EP-009
II	Complaint	Claims: negligence, breach of bailment, spoliation sanction request
III	Answer and affirmative defenses	Temperature excursion defense; pre-existing gate fatigue
IV	Discovery requests and objections	RFP 6, 9, 12; interrogatory 4; sanctions issues
V	Incident and maintenance memoranda	Dock 3 work-order entries; TireCheck message; video export log
VI	Expert and damages summaries	TempSure TS-7719 chart; Lab invoice; replacement estimates
VII	Issues for hearing	Preservation order; motion to compel; adverse inference request

The index intentionally does not resolve the conflict between the camera overlay time and the driver GPS time. The separate affidavit and hearing transcript should be used to normalize those entries.

I. Chronology of Material Events

Date / Time	Source	Event Claimed	Potential Conflict
2025-10-12 14:18	Work Order WO-7781	Dock 3 left hinge flagged for "intermittent bind".	Defendant says damage was pre-existing; plaintiff says bind was minor.
2025-10-15 20:59	TempSure TS-7719	Logger first records 9.1 C, above target.	Excursion may predate driver arrival.
2025-10-15 21:24	GPS ping NS-2041	Truck at Old Mill Road, 2.1 miles from dock.	Plaintiff places truck near dock earlier.
2025-10-15 21:31	Driver text to dispatch	"Gate is half down, waiting for guard."	Text is actual time, not camera overlay.
2025-10-15 21:42 overlay	CAM-D3 still	Truck reverse lights visible near Dock 3.	Menon says camera lagged 11 minutes. Actual time may be 21:53.
2025-10-15 21:48 overlay	Photo E-1	Yellow transfer visible on gate frame.	If lag applied, actual time is 21:59.
2025-10-15 22:05	Security incident log	Gate reported stuck and scratched.	Work order has old ticket number.
2025-10-16 08:13	Photo E-2	Rear bumper of NS-2041 photographed with yellow transfer.	Custody of vehicle overnight disputed.

The parties dispute whether the physical condition of Dock 3 changed between 21:31 and 22:05 on the incident date, and whether that change caused a delay in securing the refrigerated shipment.

Northstar denies that its vehicle contacted the gate and contends that any temperature excursion began before its driver reached the receiving bay.

Rivera alleges that Northstar employees altered or failed to preserve loading-dock video, maintenance work orders, and driver communication logs after receiving notice of a potential claim.

The pleadings reference Exhibits A through F, including photo exhibits E-1 and E-2, the TempSure logger chart, and the March 18, 2026 deposition errata sheet.

Every time reference in the dock-camera material must be read with the eleven-minute lag disclosed in the Menon affidavit unless the document expressly states it was normalized to actual time.

The parties dispute whether the physical condition of Dock 3 changed between 21:31 and 22:05 on the incident date, and whether that change caused a delay in securing the refrigerated shipment.

Northstar denies that its vehicle contacted the gate and contends that any temperature excursion began before its driver reached the receiving bay.

Rivera alleges that Northstar employees altered or failed to preserve loading-dock video, maintenance work orders, and driver communication logs after receiving notice of a potential claim.

The pleadings reference Exhibits A through F, including photo exhibits E-1 and E-2, the TempSure logger chart, and the March 18, 2026 deposition errata sheet.

II. Complaint

Plaintiff Maira Rivera, doing business as Rivera Instruments, alleges as follows:

1. Plaintiff operates a small laboratory-instrument refurbishment business and maintains temperature-controlled inventory for university and hospital customers.
2. Defendant Northstar Courier, LLC contracted to retrieve a refrigerated crate containing three calibrated spectrometry components from Dock 3, 1180 Kingsley Industrial Road, Brenton, Franklin.
3. The shipment was held for customer Alton Biomedical under a purchase order requiring continuous storage between 2 C and 8 C.
4. On October 15, 2025, Northstar assigned driver Evan Holt to truck NS-2041 and dispatch route BR-17.
5. Plaintiff contends that the driver reversed into the Dock 3 gate, disabled the gate, and delayed release of the crate for approximately thirty-eight minutes.
6. Plaintiff further contends that the delay caused the freezer transfer container to remain unsealed and contributed to the temperature excursion shown in TempSure logger TS-7719.
7. Plaintiff relies on visible yellow paint transfer on the Dock 3 frame and on a matching yellow mark photographed on the truck bumper the following morning.
8. Plaintiff alleges that Northstar had notice of potential litigation no later than October 16, 2025 at 09:42, when Northstar received the email captioned 'Dock strike and spoiled crate - hold video'.
9. Despite that notice, Northstar produced only four still frames from CAM-D3 and reported that the native video had been overwritten after fourteen days.
10. Plaintiff seeks damages for gate repair, spoiled inventory, customer chargeback, expedited recalibration, and business interruption.
11. Plaintiff operates a small laboratory-instrument refurbishment business and maintains temperature-controlled inventory for university and hospital customers.
12. Defendant Northstar Courier, LLC contracted to retrieve a refrigerated crate containing three calibrated spectrometry components from Dock 3, 1180 Kingsley Industrial Road, Brenton, Franklin.
13. The shipment was held for customer Alton Biomedical under a purchase order requiring continuous storage between 2 C and 8 C.
14. On October 15, 2025, Northstar assigned driver Evan Holt to truck NS-2041 and dispatch route BR-17.
15. Plaintiff contends that the driver reversed into the Dock 3 gate, disabled the gate, and delayed release of the crate for approximately thirty-eight minutes.
16. Plaintiff further contends that the delay caused the freezer transfer container to remain unsealed and contributed to the temperature excursion shown in TempSure logger TS-7719.
17. Plaintiff relies on visible yellow paint transfer on the Dock 3 frame and on a matching yellow mark photographed on the truck bumper the following morning. Paragraph 17 also incorporates Exhibit E-1 and Menon Affidavit paragraph 10, which refer to a camera overlay time rather than actual clock time.
18. Plaintiff alleges that Northstar had notice of potential litigation no later than October 16, 2025 at 09:42, when Northstar received the email captioned 'Dock strike and spoiled crate - hold video'.
19. Despite that notice, Northstar produced only four still frames from CAM-D3 and reported that the native video had been overwritten after fourteen days.
20. Plaintiff seeks damages for gate repair, spoiled inventory, customer chargeback, expedited recalibration, and business interruption.
21. Plaintiff operates a small laboratory-instrument refurbishment business and maintains temperature-controlled inventory for university and hospital customers.

22. Defendant Northstar Courier, LLC contracted to retrieve a refrigerated crate containing three calibrated spectrometry components from Dock 3, 1180 Kingsley Industrial Road, Brenton, Franklin.
23. The shipment was held for customer Alton Biomedical under a purchase order requiring continuous storage between 2 C and 8 C.
24. On October 15, 2025, Northstar assigned driver Evan Holt to truck NS-2041 and dispatch route BR-17.
25. Plaintiff contends that the driver reversed into the Dock 3 gate, disabled the gate, and delayed release of the crate for approximately thirty-eight minutes.
26. Plaintiff further contends that the delay caused the freezer transfer container to remain unsealed and contributed to the temperature excursion shown in TempSure logger TS-7719.
27. Plaintiff relies on visible yellow paint transfer on the Dock 3 frame and on a matching yellow mark photographed on the truck bumper the following morning.
28. Plaintiff alleges that Northstar had notice of potential litigation no later than October 16, 2025 at 09:42, when Northstar received the email captioned 'Dock strike and spoiled crate - hold video'.
29. Despite that notice, Northstar produced only four still frames from CAM-D3 and reported that the native video had been overwritten after fourteen days.
30. Plaintiff seeks damages for gate repair, spoiled inventory, customer chargeback, expedited recalibration, and business interruption.
31. Plaintiff operates a small laboratory-instrument refurbishment business and maintains temperature-controlled inventory for university and hospital customers. Paragraph 31 also incorporates Exhibit E-1 and Menon Affidavit paragraph 9, which refer to a camera overlay time rather than actual clock time.
32. Defendant Northstar Courier, LLC contracted to retrieve a refrigerated crate containing three calibrated spectrometry components from Dock 3, 1180 Kingsley Industrial Road, Brenton, Franklin.
33. The shipment was held for customer Alton Biomedical under a purchase order requiring continuous storage between 2 C and 8 C.
34. On October 15, 2025, Northstar assigned driver Evan Holt to truck NS-2041 and dispatch route BR-17.
35. Plaintiff contends that the driver reversed into the Dock 3 gate, disabled the gate, and delayed release of the crate for approximately thirty-eight minutes.
36. Plaintiff further contends that the delay caused the freezer transfer container to remain unsealed and contributed to the temperature excursion shown in TempSure logger TS-7719.
37. Plaintiff relies on visible yellow paint transfer on the Dock 3 frame and on a matching yellow mark photographed on the truck bumper the following morning.
38. Plaintiff alleges that Northstar had notice of potential litigation no later than October 16, 2025 at 09:42, when Northstar received the email captioned 'Dock strike and spoiled crate - hold video'.
39. Despite that notice, Northstar produced only four still frames from CAM-D3 and reported that the native video had been overwritten after fourteen days. Plaintiff pleads, without conceding, that the temperature logger first crossed the contract threshold at 21:49 actual time.
40. Plaintiff seeks damages for gate repair, spoiled inventory, customer chargeback, expedited recalibration, and business interruption.
41. Plaintiff operates a small laboratory-instrument refurbishment business and maintains temperature-controlled inventory for university and hospital customers.
42. Defendant Northstar Courier, LLC contracted to retrieve a refrigerated crate containing three calibrated spectrometry components from Dock 3, 1180 Kingsley Industrial Road, Brenton, Franklin.
43. The shipment was held for customer Alton Biomedical under a purchase order requiring continuous storage between 2 C and 8 C.
44. On October 15, 2025, Northstar assigned driver Evan Holt to truck NS-2041 and dispatch route BR-17.

45. Plaintiff contends that the driver reversed into the Dock 3 gate, disabled the gate, and delayed release of the crate for approximately thirty-eight minutes.
46. Plaintiff further contends that the delay caused the freezer transfer container to remain unsealed and contributed to the temperature excursion shown in TempSure logger TS-7719. Paragraph 46 also incorporates Exhibit E-1 and Menon Affidavit paragraph 9, which refer to a camera overlay time rather than actual clock time.
47. Plaintiff relies on visible yellow paint transfer on the Dock 3 frame and on a matching yellow mark photographed on the truck bumper the following morning.
48. Plaintiff alleges that Northstar had notice of potential litigation no later than October 16, 2025 at 09:42, when Northstar received the email captioned 'Dock strike and spoiled crate - hold video'.
49. Despite that notice, Northstar produced only four still frames from CAM-D3 and reported that the native video had been overwritten after fourteen days.
50. Plaintiff seeks damages for gate repair, spoiled inventory, customer chargeback, expedited recalibration, and business interruption.
51. Plaintiff operates a small laboratory-instrument refurbishment business and maintains temperature-controlled inventory for university and hospital customers.
52. Defendant Northstar Courier, LLC contracted to retrieve a refrigerated crate containing three calibrated spectrometry components from Dock 3, 1180 Kingsley Industrial Road, Brenton, Franklin.
53. The shipment was held for customer Alton Biomedical under a purchase order requiring continuous storage between 2 C and 8 C.
54. On October 15, 2025, Northstar assigned driver Evan Holt to truck NS-2041 and dispatch route BR-17.
55. Plaintiff contends that the driver reversed into the Dock 3 gate, disabled the gate, and delayed release of the crate for approximately thirty-eight minutes.
56. Plaintiff further contends that the delay caused the freezer transfer container to remain unsealed and contributed to the temperature excursion shown in TempSure logger TS-7719.
57. Plaintiff relies on visible yellow paint transfer on the Dock 3 frame and on a matching yellow mark photographed on the truck bumper the following morning.
58. Plaintiff alleges that Northstar had notice of potential litigation no later than October 16, 2025 at 09:42, when Northstar received the email captioned 'Dock strike and spoiled crate - hold video'. Paragraph 58 also incorporates Exhibit E-1 and Menon Affidavit paragraph 11, which refer to a camera overlay time rather than actual clock time.
59. Despite that notice, Northstar produced only four still frames from CAM-D3 and reported that the native video had been overwritten after fourteen days.
60. Plaintiff seeks damages for gate repair, spoiled inventory, customer chargeback, expedited recalibration, and business interruption.
61. Plaintiff operates a small laboratory-instrument refurbishment business and maintains temperature-controlled inventory for university and hospital customers. Plaintiff disputes Northstar's assertion that a Dock 3 hinge issue was already open under WO-7781.
62. Defendant Northstar Courier, LLC contracted to retrieve a refrigerated crate containing three calibrated spectrometry components from Dock 3, 1180 Kingsley Industrial Road, Brenton, Franklin.
63. The shipment was held for customer Alton Biomedical under a purchase order requiring continuous storage between 2 C and 8 C.
64. On October 15, 2025, Northstar assigned driver Evan Holt to truck NS-2041 and dispatch route BR-17.
65. Plaintiff contends that the driver reversed into the Dock 3 gate, disabled the gate, and delayed release of the crate for approximately thirty-eight minutes.
66. Plaintiff further contends that the delay caused the freezer transfer container to remain unsealed and contributed to the temperature excursion shown in TempSure logger TS-7719.

67. Plaintiff relies on visible yellow paint transfer on the Dock 3 frame and on a matching yellow mark photographed on the truck bumper the following morning.

68. Plaintiff alleges that Northstar had notice of potential litigation no later than October 16, 2025 at 09:42, when Northstar received the email captioned 'Dock strike and spoiled crate - hold video'.

69. Despite that notice, Northstar produced only four still frames from CAM-D3 and reported that the native video had been overwritten after fourteen days.

70. Plaintiff seeks damages for gate repair, spoiled inventory, customer chargeback, expedited recalibration, and business interruption.

71. Plaintiff operates a small laboratory-instrument refurbishment business and maintains temperature-controlled inventory for university and hospital customers.

72. Defendant Northstar Courier, LLC contracted to retrieve a refrigerated crate containing three calibrated spectrometry components from Dock 3, 1180 Kingsley Industrial Road, Brenton, Franklin.

Claims for Relief

Count I - Negligence

Northstar owed a duty of ordinary care in reversing and loading operations and allegedly breached that duty by striking a dock fixture and obstructing release of refrigerated goods.

Count II - Breach of Contract / Bailment

Plaintiff alleges Northstar accepted custody of sensitive cargo and failed to maintain required transfer conditions.

Count III - Negligent Spoliation / Sanctions Request

Plaintiff requests evidentiary sanctions for failure to preserve native CAM-D3 video and the driver tablet audit trail.

Count IV - Declaratory Relief

Plaintiff asks the court to determine that the contract limitations clause does not bar consequential damages caused by gross negligence.

III. Answer and Affirmative Defenses

Response to Paragraph 1. Admitted only that Northstar received a service request for Route BR-17; otherwise denied.

Response to Paragraph 2. Denied. The driver did not strike the Dock 3 gate, and any mechanical difficulty was known to Rivera or the site owner before the route arrived.

Response to Paragraph 3. Northstar lacks knowledge sufficient to admit or deny plaintiff's claimed internal temperature-control procedures and therefore denies them.

Response to Paragraph 4. Admitted that four still images were produced; denied that additional responsive native footage remained available after routine retention expired.

Response to Paragraph 5. Denied that the TempSure logger chart proves causation; Northstar states that the excursion began before the truck reached the premises.

Response to Paragraph 6. Admitted that truck NS-2041 was inspected on October 16, 2025; denied that the yellow mark conclusively matches the Dock 3 frame.

Response to Paragraph 7. Admitted only that Northstar received a service request for Route BR-17; otherwise denied.

Response to Paragraph 8. Denied. The driver did not strike the Dock 3 gate, and any mechanical difficulty was known to Rivera or the site owner before the route arrived.

Response to Paragraph 9. Northstar lacks knowledge sufficient to admit or deny plaintiff's claimed internal temperature-control procedures and therefore denies them.

Response to Paragraph 10. Admitted that four still images were produced; denied that additional responsive native footage remained available after routine retention expired.

Response to Paragraph 11. Denied that the TempSure logger chart proves causation; Northstar states that the excursion began before the truck reached the premises.

Response to Paragraph 12. Admitted that truck NS-2041 was inspected on October 16, 2025; denied that the yellow mark conclusively matches the Dock 3 frame.

Response to Paragraph 13. Admitted only that Northstar received a service request for Route BR-17; otherwise denied.

Response to Paragraph 14. Denied. The driver did not strike the Dock 3 gate, and any mechanical difficulty was known to Rivera or the site owner before the route arrived.

Response to Paragraph 15. Northstar lacks knowledge sufficient to admit or deny plaintiff's claimed internal temperature-control procedures and therefore denies them.

Response to Paragraph 16. Admitted that four still images were produced; denied that additional responsive native footage remained available after routine retention expired.

Response to Paragraph 17. Denied that the TempSure logger chart proves causation; Northstar states that the excursion began before the truck reached the premises.

Response to Paragraph 18. Admitted that truck NS-2041 was inspected on October 16, 2025; denied that the yellow mark conclusively matches the Dock 3 frame.

Response to Paragraph 19. Admitted only that Northstar received a service request for Route BR-17; otherwise denied.

Response to Paragraph 20. Denied. The driver did not strike the Dock 3 gate, and any mechanical difficulty was known to Rivera or the site owner before the route arrived.

Response to Paragraph 21. Northstar lacks knowledge sufficient to admit or deny plaintiff's claimed internal temperature-control procedures and therefore denies them.

Response to Paragraph 22. Admitted that four still images were produced; denied that additional responsive native footage remained available after routine retention expired. The GPS ping at 21:24 places NS-2041 at Old Mill Road, not inside the loading bay.

Response to Paragraph 23. Denied that the TempSure logger chart proves causation; Northstar states that the excursion began before the truck reached the premises.

Response to Paragraph 24. Admitted that truck NS-2041 was inspected on October 16, 2025; denied that the yellow mark conclusively matches the Dock 3 frame.

Response to Paragraph 25. Admitted only that Northstar received a service request for Route BR-17; otherwise denied.

Response to Paragraph 26. Denied. The driver did not strike the Dock 3 gate, and any mechanical difficulty was known to Rivera or the site owner before the route arrived.

Response to Paragraph 27. Northstar lacks knowledge sufficient to admit or deny plaintiff's claimed internal temperature-control procedures and therefore denies them.

Response to Paragraph 28. Admitted that four still images were produced; denied that additional responsive native footage remained available after routine retention expired.

Response to Paragraph 29. Denied that the TempSure logger chart proves causation; Northstar states that the excursion began before the truck reached the premises.

Response to Paragraph 30. Admitted that truck NS-2041 was inspected on October 16, 2025; denied that the yellow mark conclusively matches the Dock 3 frame.

Response to Paragraph 31. Admitted only that Northstar received a service request for Route BR-17; otherwise denied.

Response to Paragraph 32. Denied. The driver did not strike the Dock 3 gate, and any mechanical difficulty was known to Rivera or the site owner before the route arrived.

Response to Paragraph 33. Northstar lacks knowledge sufficient to admit or deny plaintiff's claimed internal temperature-control procedures and therefore denies them.

Response to Paragraph 34. Admitted that four still images were produced; denied that additional responsive native footage remained available after routine retention expired.

Response to Paragraph 35. Denied that the TempSure logger chart proves causation; Northstar states that the excursion began before the truck reached the premises.

Response to Paragraph 36. Admitted that truck NS-2041 was inspected on October 16, 2025; denied that the yellow mark conclusively matches the Dock 3 frame.

Response to Paragraph 37. Admitted only that Northstar received a service request for Route BR-17; otherwise denied.

Response to Paragraph 38. Denied. The driver did not strike the Dock 3 gate, and any mechanical difficulty was known to Rivera or the site owner before the route arrived.

Response to Paragraph 39. Northstar lacks knowledge sufficient to admit or deny plaintiff's claimed internal temperature-control procedures and therefore denies them.

Response to Paragraph 40. Admitted that four still images were produced; denied that additional responsive native footage remained available after routine retention expired.

Response to Paragraph 41. Denied that the TempSure logger chart proves causation; Northstar states that the excursion began before the truck reached the premises.

Response to Paragraph 42. Admitted that truck NS-2041 was inspected on October 16, 2025; denied that the yellow mark conclusively matches the Dock 3 frame.

Response to Paragraph 43. Admitted only that Northstar received a service request for Route BR-17; otherwise denied.

Response to Paragraph 44. Denied. The driver did not strike the Dock 3 gate, and any mechanical difficulty was known to Rivera or the site owner before the route arrived.

Response to Paragraph 45. Northstar lacks knowledge sufficient to admit or deny plaintiff's claimed internal temperature-control procedures and therefore denies them.

Response to Paragraph 46. Admitted that four still images were produced; denied that additional responsive native footage remained available after routine retention expired.

Response to Paragraph 47. Denied that the TempSure logger chart proves causation; Northstar states that the excursion began before the truck reached the premises.

Response to Paragraph 48. Admitted that truck NS-2041 was inspected on October 16, 2025; denied that the yellow mark conclusively matches the Dock 3 frame. Northstar preserves the defense that CAM-D3 overlay timestamps are not synchronized to dispatch timestamps.

Response to Paragraph 49. Admitted only that Northstar received a service request for Route BR-17; otherwise denied.

Response to Paragraph 50. Denied. The driver did not strike the Dock 3 gate, and any mechanical difficulty was known to Rivera or the site owner before the route arrived.

Response to Paragraph 51. Northstar lacks knowledge sufficient to admit or deny plaintiff's claimed internal temperature-control procedures and therefore denies them.

Response to Paragraph 52. Admitted that four still images were produced; denied that additional responsive native footage remained available after routine retention expired.

Response to Paragraph 53. Denied that the TempSure logger chart proves causation; Northstar states that the excursion began before the truck reached the premises.

Response to Paragraph 54. Admitted that truck NS-2041 was inspected on October 16, 2025; denied that the yellow mark conclusively matches the Dock 3 frame.

Response to Paragraph 55. Admitted only that Northstar received a service request for Route BR-17; otherwise denied.

Response to Paragraph 56. Denied. The driver did not strike the Dock 3 gate, and any mechanical difficulty was known to Rivera or the site owner before the route arrived.

Response to Paragraph 57. Northstar lacks knowledge sufficient to admit or deny plaintiff's claimed internal temperature-control procedures and therefore denies them.

Response to Paragraph 58. Admitted that four still images were produced; denied that additional responsive native footage remained available after routine retention expired.

Response to Paragraph 59. Denied that the TempSure logger chart proves causation; Northstar states that the excursion began before the truck reached the premises.

Response to Paragraph 60. Admitted that truck NS-2041 was inspected on October 16, 2025; denied that the yellow mark conclusively matches the Dock 3 frame.

Response to Paragraph 61. Admitted only that Northstar received a service request for Route BR-17; otherwise denied.

Response to Paragraph 62. Denied. The driver did not strike the Dock 3 gate, and any mechanical difficulty was known to Rivera or the site owner before the route arrived.

Response to Paragraph 63. Northstar lacks knowledge sufficient to admit or deny plaintiff's claimed internal temperature-control procedures and therefore denies them.

Response to Paragraph 64. Admitted that four still images were produced; denied that additional responsive native footage remained available after routine retention expired.

Response to Paragraph 65. Denied that the TempSure logger chart proves causation; Northstar states that the excursion began before the truck reached the premises.

Response to Paragraph 66. Admitted that truck NS-2041 was inspected on October 16, 2025; denied that the yellow mark conclusively matches the Dock 3 frame.

Response to Paragraph 67. Admitted only that Northstar received a service request for Route BR-17; otherwise denied.

Response to Paragraph 68. Denied. The driver did not strike the Dock 3 gate, and any mechanical difficulty was known to Rivera or the site owner before the route arrived.

Response to Paragraph 69. Northstar lacks knowledge sufficient to admit or deny plaintiff's claimed internal temperature-control procedures and therefore denies them.

Response to Paragraph 70. Admitted that four still images were produced; denied that additional responsive native footage remained available after routine retention expired.

Response to Paragraph 71. Denied that the TempSure logger chart proves causation; Northstar states that the excursion began before the truck reached the premises.

Response to Paragraph 72. Admitted that truck NS-2041 was inspected on October 16, 2025; denied that the yellow mark conclusively matches the Dock 3 frame.

No.	Affirmative Defense	Summary
1	Contractual limitation	Service terms cap damages at the price of transport unless gross negligence is proven.
2	Comparative fault	Plaintiff or site personnel failed to close and inspect the gate after a known hinge fault.
3	Causation	The temperature excursion allegedly started before the vehicle reached Dock 3.
4	Mitigation	Plaintiff delayed removal of cargo from the staging area until after 22:18.
5	Routine retention	Native video was overwritten by an automated fourteen-day retention process before a preservation hold was technically applied.

IV. Discovery Requests, Responses, and Objections

The following excerpt combines plaintiff requests for production, Northstar responses, and later meet-and-confer notes. Requests most likely to matter for AI testing are RFP 6, RFP 9, RFP 12, and Interrogatory 4.

RFP 1

Request: Produce all video, still images, export logs, retention settings, and access records for CAM-D3 between 21:00 and 22:30 on October 15, 2025.

Response: Northstar will produce still images and the retention policy. It objects to the request for native video because no native video remains after routine overwrite.

Meet-and-confer note: No unresolved issue recorded.

RFP 2

Request: Produce inspection records, work orders, and repair invoices for Dock 3 for the thirty days before and after the incident.

Response: Northstar objects that Dock 3 is owned by the site landlord, but produces WO-7781 and the October 16 repair invoice located in its facilities archive.

Meet-and-confer note: No unresolved issue recorded.

RFP 3

Request: Produce driver tablet logs, GPS data, dispatch chat, and route exception notes for truck NS-2041 on Route BR-17.

Response: Northstar produces dispatch text extracts and a spreadsheet of GPS pings, but withholds full tablet diagnostic logs as disproportionate.

Meet-and-confer note: No unresolved issue recorded.

RFP 4

Request: Produce all documents relating to temperature logger TS-7719 and any internal analysis of cargo temperature.

Response: Northstar states that it does not possess the logger and refers plaintiff to Rivera Instruments; it produces one email discussing logger data received from plaintiff.

Meet-and-confer note: No unresolved issue recorded.

RFP 5

Request: Produce photographs of truck NS-2041 taken after October 15, 2025.

Response: Northstar produces three shop photos and states that overnight parking lot camera footage was not retained.

Meet-and-confer note: No unresolved issue recorded.

RFP 6

Request: Produce all video, still images, export logs, retention settings, and access records for CAM-D3 between 21:00 and 22:30 on October 15, 2025.

Response: Northstar will produce still images and the retention policy. It objects to the request for native video because no native video remains after routine overwrite.

Meet-and-confer note: Counsel flagged this item on March 16, 2026; no agreement was reached on scope of native logs.

RFP 7

Request: Produce inspection records, work orders, and repair invoices for Dock 3 for the thirty days before and after the incident.

Response: Northstar objects that Dock 3 is owned by the site landlord, but produces WO-7781 and the October 16 repair invoice located in its facilities archive.

Meet-and-confer note: No unresolved issue recorded.

RFP 8

Request: Produce driver tablet logs, GPS data, dispatch chat, and route exception notes for truck NS-2041 on Route BR-17.

Response: Northstar produces dispatch text extracts and a spreadsheet of GPS pings, but withholds full tablet diagnostic logs as disproportionate.

Meet-and-confer note: No unresolved issue recorded.

RFP 9

Request: Produce all documents relating to temperature logger TS-7719 and any internal analysis of cargo temperature.

Response: Northstar states that it does not possess the logger and refers plaintiff to Rivera Instruments; it produces one email discussing logger data received from plaintiff.

Meet-and-confer note: Counsel flagged this item on March 19, 2026; no agreement was reached on scope of native logs.

RFP 10

Request: Produce photographs of truck NS-2041 taken after October 15, 2025.

Response: Northstar produces three shop photos and states that overnight parking lot camera footage was not retained.

Meet-and-confer note: No unresolved issue recorded.

RFP 11

Request: Produce all video, still images, export logs, retention settings, and access records for CAM-D3 between 21:00 and 22:30 on October 15, 2025.

Response: Northstar will produce still images and the retention policy. It objects to the request for native video because no native video remains after routine overwrite.

Meet-and-confer note: No unresolved issue recorded.

RFP 12

Request: Produce inspection records, work orders, and repair invoices for Dock 3 for the thirty days before and after the incident.

Response: Northstar objects that Dock 3 is owned by the site landlord, but produces WO-7781 and the October 16 repair invoice located in its facilities archive.

Meet-and-confer note: Counsel flagged this item on March 22, 2026; no agreement was reached on scope of native logs.

RFP 13

Request: Produce driver tablet logs, GPS data, dispatch chat, and route exception notes for truck NS-2041 on Route BR-17.

Response: Northstar produces dispatch text extracts and a spreadsheet of GPS pings, but withholds full tablet diagnostic logs as disproportionate.

Meet-and-confer note: No unresolved issue recorded.

RFP 14

Request: Produce all documents relating to temperature logger TS-7719 and any internal analysis of cargo temperature.

Response: Northstar states that it does not possess the logger and refers plaintiff to Rivera Instruments; it produces one email discussing logger data received from plaintiff.

Meet-and-confer note: No unresolved issue recorded.

RFP 15

Request: Produce photographs of truck NS-2041 taken after October 15, 2025.

Response: Northstar produces three shop photos and states that overnight parking lot camera footage was not retained.

Meet-and-confer note: No unresolved issue recorded.

RFP 16

Request: Produce all video, still images, export logs, retention settings, and access records for CAM-D3 between 21:00 and 22:30 on October 15, 2025.

Response: Northstar will produce still images and the retention policy. It objects to the request for native video because no native video remains after routine overwrite.

Meet-and-confer note: No unresolved issue recorded.

RFP 17

Request: Produce inspection records, work orders, and repair invoices for Dock 3 for the thirty days before and after the incident.

Response: Northstar objects that Dock 3 is owned by the site landlord, but produces WO-7781 and the October 16 repair invoice located in its facilities archive.

Meet-and-confer note: Counsel flagged this item on March 11, 2026; no agreement was reached on scope of native logs.

RFP 18

Request: Produce driver tablet logs, GPS data, dispatch chat, and route exception notes for truck NS-2041 on Route BR-17.

Response: Northstar produces dispatch text extracts and a spreadsheet of GPS pings, but withholds full tablet diagnostic logs as disproportionate.

Meet-and-confer note: No unresolved issue recorded.

RFP 19

Request: Produce all documents relating to temperature logger TS-7719 and any internal analysis of cargo temperature.

Response: Northstar states that it does not possess the logger and refers plaintiff to Rivera Instruments; it produces one email discussing logger data received from plaintiff.

Meet-and-confer note: No unresolved issue recorded.

RFP 20

Request: Produce photographs of truck NS-2041 taken after October 15, 2025.

Response: Northstar produces three shop photos and states that overnight parking lot camera footage was not retained.

Meet-and-confer note: No unresolved issue recorded.

RFP 21

Request: Produce all video, still images, export logs, retention settings, and access records for CAM-D3 between 21:00 and 22:30 on October 15, 2025.

Response: Northstar will produce still images and the retention policy. It objects to the request for native video because no native video remains after routine overwrite.

Meet-and-confer note: No unresolved issue recorded.

RFP 22

Request: Produce inspection records, work orders, and repair invoices for Dock 3 for the thirty days before and after the incident.

Response: Northstar objects that Dock 3 is owned by the site landlord, but produces WO-7781 and the October 16 repair invoice located in its facilities archive.

Meet-and-confer note: No unresolved issue recorded.

RFP 23

Request: Produce driver tablet logs, GPS data, dispatch chat, and route exception notes for truck NS-2041 on Route BR-17.

Response: Northstar produces dispatch text extracts and a spreadsheet of GPS pings, but withholds full tablet diagnostic logs as disproportionate.

Meet-and-confer note: No unresolved issue recorded.

RFP 24

Request: Produce all documents relating to temperature logger TS-7719 and any internal analysis of cargo temperature.

Response: Northstar states that it does not possess the logger and refers plaintiff to Rivera Instruments; it produces one email discussing logger data received from plaintiff.

Meet-and-confer note: Counsel flagged this item on March 18, 2026; no agreement was reached on scope of native logs.

RFP 25

Request: Produce photographs of truck NS-2041 taken after October 15, 2025.

Response: Northstar produces three shop photos and states that overnight parking lot camera footage was not retained.

Meet-and-confer note: No unresolved issue recorded.

RFP 26

Request: Produce all video, still images, export logs, retention settings, and access records for CAM-D3 between 21:00 and 22:30 on October 15, 2025.

Response: Northstar will produce still images and the retention policy. It objects to the request for native video because no native video remains after routine overwrite.

Meet-and-confer note: No unresolved issue recorded.

RFP 27

Request: Produce inspection records, work orders, and repair invoices for Dock 3 for the thirty days before and after the incident.

Response: Northstar objects that Dock 3 is owned by the site landlord, but produces WO-7781 and the October 16 repair invoice located in its facilities archive.

Meet-and-confer note: No unresolved issue recorded.

RFP 28

Request: Produce driver tablet logs, GPS data, dispatch chat, and route exception notes for truck NS-2041 on Route BR-17.

Response: Northstar produces dispatch text extracts and a spreadsheet of GPS pings, but withholds full tablet diagnostic logs as disproportionate.

Meet-and-confer note: No unresolved issue recorded.

RFP 29

Request: Produce all documents relating to temperature logger TS-7719 and any internal analysis of cargo temperature.

Response: Northstar states that it does not possess the logger and refers plaintiff to Rivera Instruments; it produces one email discussing logger data received from plaintiff.

Meet-and-confer note: No unresolved issue recorded.

RFP 30

Request: Produce photographs of truck NS-2041 taken after October 15, 2025.

Response: Northstar produces three shop photos and states that overnight parking lot camera footage was not retained.

Meet-and-confer note: No unresolved issue recorded.

V. Incident Reports and Maintenance Memoranda

Bates	Author	Entry	Notes for Review
NS-IR-001	Guard Luis Arendt	21:31 actual: driver reports gate is half down and asks whether reverse approach is clear.	Time based on dispatch transcript.
NS-IR-002	Guard Luis Arendt	21:48 overlay: visible crease in lower left gate slat in CAM-D3 still.	Overlay time only; Menon affidavit says lag = 11 minutes.
NS-IR-003	Facilities bot	WO-7781 status changed from "monitor" to "repair urgent" at 22:06.	Same work order opened October 12.
NS-IR-004	Dispatcher R. Kolbe	Driver denied physical contact with gate and reported that gate was already binding.	Dispatch note created 23:14.
NS-IR-005	Shop tech Maris Fenn	08:13 next morning: rear bumper yellow transfer observed on NS-2041.	Photo E-2; chain of custody begins at 08:02.

The parties dispute whether the physical condition of Dock 3 changed between 21:31 and 22:05 on the incident date, and whether that change caused a delay in securing the refrigerated shipment.

Northstar denies that its vehicle contacted the gate and contends that any temperature excursion began before its driver reached the receiving bay.

Rivera alleges that Northstar employees altered or failed to preserve loading-dock video, maintenance work orders, and driver communication logs after receiving notice of a potential claim.

The pleadings reference Exhibits A through F, including photo exhibits E-1 and E-2, the TempSure logger chart, and the March 18, 2026 deposition errata sheet.

Every time reference in the dock-camera material must be read with the eleven-minute lag disclosed in the Menon affidavit unless the document expressly states it was normalized to actual time.

The parties dispute whether the physical condition of Dock 3 changed between 21:31 and 22:05 on the incident date, and whether that change caused a delay in securing the refrigerated shipment.

VI. Expert and Damages Summaries

Category	Claimed Amount	Source	Disputed Point
Gate repair	\$4,860.00	Brenton Door invoice 4109	Whether damage was pre-existing or caused by NS-2041.
Spoiled components	\$38,400.00	Alton Biomedical chargeback	Whether temperature excursion was caused by delay at Dock 3.
Expedited recalibration	\$7,950.00	Vector Calibration invoice VC-2062	Whether recalibration was required by contract or customer preference.
Business interruption	\$12,500.00	Rivera internal estimate	Northstar challenges methodology and supporting records.
Evidence preservation costs	\$3,100.00	Forensics vendor statement	Reasonableness disputed.

Expert Note 1: Temperature Causation

Plaintiff's temperature consultant states that each additional minute outside the 2 C to 8 C band increased the probability of recalibration failure. The consultant did not personally inspect the shipping crate and relied on TS-7719 exported data. Northstar points to the 20:59 excursion and argues that cargo conditions had already degraded before any alleged gate contact.

Northstar denies that its vehicle contacted the gate and contends that any temperature excursion began before its driver reached the receiving bay.

Expert Note 2: Mechanical Causation

Northstar's mechanical consultant states that the left hinge had wear marks older than October 15 and that yellow transfer is not sufficient to identify a specific vehicle. Plaintiff responds that a fresh crescent-shaped abrasion appears in E-1 and aligns with the bumper mark in E-2.

Rivera alleges that Northstar employees altered or failed to preserve loading-dock video, maintenance work orders, and driver communication logs after receiving notice of a potential claim.

Expert Note 3: Temperature Causation

Plaintiff's temperature consultant states that each additional minute outside the 2 C to 8 C band increased the probability of recalibration failure. The consultant did not personally inspect the shipping crate and relied on TS-7719 exported data. Northstar points to the 20:59 excursion and argues that cargo conditions had already degraded before any alleged gate contact.

The pleadings reference Exhibits A through F, including photo exhibits E-1 and E-2, the TempSure logger chart, and the March 18, 2026 deposition errata sheet.

Expert Note 4: Mechanical Causation

Northstar's mechanical consultant states that the left hinge had wear marks older than October 15 and that yellow transfer is not sufficient to identify a specific vehicle. Plaintiff responds that a fresh crescent-shaped abrasion appears in E-1 and aligns with the bumper mark in E-2.

Every time reference in the dock-camera material must be read with the eleven-minute lag disclosed in the Menon affidavit unless the document expressly states it was normalized to actual time.

Expert Note 5: Temperature Causation

Plaintiff's temperature consultant states that each additional minute outside the 2 C to 8 C band increased the probability of recalibration failure. The consultant did not personally inspect the shipping crate and relied on TS-7719 exported data. Northstar points to the 20:59 excursion and argues that cargo conditions had already degraded before any alleged gate contact.

The parties dispute whether the physical condition of Dock 3 changed between 21:31 and 22:05 on the incident date, and whether that change caused a delay in securing the refrigerated shipment.

Expert Note 6: Mechanical Causation

Northstar's mechanical consultant states that the left hinge had wear marks older than October 15 and that yellow transfer is not sufficient to identify a specific vehicle. Plaintiff responds that a fresh crescent-shaped abrasion appears in E-1 and aligns with the bumper mark in E-2.

Northstar denies that its vehicle contacted the gate and contends that any temperature excursion began before its driver reached the receiving bay.

Expert Note 7: Temperature Causation

Plaintiff's temperature consultant states that each additional minute outside the 2 C to 8 C band increased the probability of recalibration failure. The consultant did not personally inspect the shipping crate and relied on TS-7719 exported data. Northstar points to the 20:59 excursion and argues that cargo conditions had already degraded before any alleged gate contact.

Rivera alleges that Northstar employees altered or failed to preserve loading-dock video, maintenance work orders, and driver communication logs after receiving notice of a potential claim.

Expert Note 8: Mechanical Causation

Northstar's mechanical consultant states that the left hinge had wear marks older than October 15 and that yellow transfer is not sufficient to identify a specific vehicle. Plaintiff responds that a fresh crescent-shaped abrasion appears in E-1 and aligns with the bumper mark in E-2.

The pleadings reference Exhibits A through F, including photo exhibits E-1 and E-2, the TempSure logger chart, and the March 18, 2026 deposition errata sheet.

Expert Note 9: Temperature Causation

Plaintiff's temperature consultant states that each additional minute outside the 2 C to 8 C band increased the probability of recalibration failure. The consultant did not personally inspect the shipping crate and relied on TS-7719 exported data. Northstar points to the 20:59 excursion and argues that cargo conditions had already degraded before any alleged gate contact.

Every time reference in the dock-camera material must be read with the eleven-minute lag disclosed in the Menon affidavit unless the document expressly states it was normalized to actual time.

Expert Note 10: Mechanical Causation

Northstar's mechanical consultant states that the left hinge had wear marks older than October 15 and that yellow transfer is not sufficient to identify a specific vehicle. Plaintiff responds that a fresh crescent-shaped abrasion appears in E-1 and aligns with the bumper mark in E-2.

The parties dispute whether the physical condition of Dock 3 changed between 21:31 and 22:05 on the incident date, and whether that change caused a delay in securing the refrigerated shipment.

Expert Note 11: Temperature Causation

Plaintiff's temperature consultant states that each additional minute outside the 2 C to 8 C band increased the probability of recalibration failure. The consultant did not personally inspect the shipping crate and relied on TS-7719 exported data. Northstar points to the 20:59 excursion and argues that cargo conditions had already degraded before any alleged gate contact.

Northstar denies that its vehicle contacted the gate and contends that any temperature excursion began before its driver reached the receiving bay.

Expert Note 12: Mechanical Causation

Northstar's mechanical consultant states that the left hinge had wear marks older than October 15 and that yellow transfer is not sufficient to identify a specific vehicle. Plaintiff responds that a fresh crescent-shaped abrasion appears in E-1 and aligns with the bumper mark in E-2.

Rivera alleges that Northstar employees altered or failed to preserve loading-dock video, maintenance work orders, and driver communication logs after receiving notice of a potential claim.

VII. Issues Reserved for April 7, 2026 Hearing

Issue	Plaintiff Position	Northstar Position	Likely Evidence
Native CAM-D3 video	Adverse inference warranted because hold was requested before retention expired.	Routine overwrite occurred before technical hold and was not intentional.	Menon Aff.; Hearing Tr. 22:4-24:19
Driver tablet logs	Diagnostics may show reverse approach, braking, and dock proximity.	Full logs are disproportionate and contain unrelated route data.	RFP 12; dispatch extracts
Temperature causation	Delay at stuck gate materially worsened excursion.	Logger exceeded threshold before arrival.	TS-7719 chart; expert notes
Work order WO-7781	Old work-order number does not prove pre-existing damage.	Pre-existing hinge bind defeats causation and damages claim.	Work order; repair invoice
Photo authentication	Photos E-1/E-2 show matching yellow transfer.	Chain of custody and timestamp inconsistencies limit weight.	Affidavit paras. 13-18; Exhibit packet

The parties dispute whether the physical condition of Dock 3 changed between 21:31 and 22:05 on the incident date, and whether that change caused a delay in securing the refrigerated shipment.

Northstar denies that its vehicle contacted the gate and contends that any temperature excursion began before its driver reached the receiving bay.

Rivera alleges that Northstar employees altered or failed to preserve loading-dock video, maintenance work orders, and driver communication logs after receiving notice of a potential claim.

The pleadings reference Exhibits A through F, including photo exhibits E-1 and E-2, the TempSure logger chart, and the March 18, 2026 deposition errata sheet.

Every time reference in the dock-camera material must be read with the eleven-minute lag disclosed in the Menon affidavit unless the document expressly states it was normalized to actual time.
